Career Objective

With a varied background in leadership, mentoring, and education, I bring a wealth of expertise as a highly experienced full-stack developer. I am enthusiastically poised to utilise these skills in leading, mentoring and guiding a team of developers, capitalising on my extensive two decades of industry experience as a web developer.

Skills Summary

Leadership

My leadership approach centres around effective communication, and decisive decision-making. I prioritise empathy, creating a supportive environment that nurtures growth and inclusivity. Trust and accountability are foundational, fostering strong relationships and holding myself and others responsible for achieving high standards. I empower my team through delegation, enabling their leadership development.

Mentor

Many times in my career I've been in a mentorship role helping young developers or students up-skill to become great software developers. I'm an active listener and provide constructive feedback with clear communication and advice. I try to make a safe to fail environment for these mentees so they can learn and flourish to become more autonomous and independent.

Educator

As a staunch advocate of lifelong learning, I believe that education is paramount in fostering skill development, both in technical and soft areas. I actively pursue ongoing education, continuously acquiring new techniques, skills and insights that I share through my personal blog and YouTube channel enhanced with my time teaching classes and workshops. Furthermore, I am dedicated to fostering a culture of continuous learning within my team, encouraging them to expand their knowledge and skill sets. I take pride in identifying areas for improvement among team members and actively supporting their growth in those areas.

Experienced

As a developer of over 20 years I have experience in working with a wide range of web based technologies. I've worked for small and large companies, as well as small and large teams using multiple working methodologies (agile, kanban, scrum etc). I've worked multiple roles full time remotely using technologies React.js, React Native, Node.js, .Net Core, with strong front end skills.
